

Track Your Progress: Developing a Research Agenda for Measuring Ecosystem Building

As the field of ecosystem research is emerging, and many players are working on developing priorities to better understand ecosystem building and how to measure it, feedback from practitioners is invaluable.

Your mission, should you choose to accept it...

Help this emerging field of researchers develop a Research Agenda on Ecosystem Building to ensure it focuses on answering practitioner-relevant questions.

Example Solutions

Starting from a blank page can be difficult—the following sample ideas are here to markup, change, and riff on as you determine the deliverable you will start building today.

- Build a list of research questions and potential sources for answers that already exist

Conversation Starters

Common questions asked by ecosystem builders, that could be explored...

- What do you wish you could track in your ecosystem?
- In the big picture, what are the key questions you have when building ecosystems that work better for entrepreneurs?
- Imagine a world when you can make each entrepreneur an AI and track their every move with every system. What would you track?
